

TWO-STEP EQUATIONS

What would you move first?

1) $3 = 9 - 3c$

First I would move the _____

2) $5e + 20 = 10e$

First I would move the _____

3) $12 - 4s = 2s$

First I would move the _____

Solve the equations:

4) $7p + 50 = 2p$

11) $9p + 60 = 3p$

5) $51 - 3q = -63$

12) $\frac{p}{4} - 10 = 10$

6) $42 = 22 + \frac{x}{4}$

13) $33 - \frac{n}{5} = 183$

7) $49 + 7s = 14s$

8) $4c = -10 + 24c$

14) $4t = 152 - 34t$

9) $29 - 9y = 362$

15) $21 + 7a = 14a$

10) $2t = 76 - 17t$

16) $2x = 60 - 18x$
