

STORY WORD PROBLEMS

Last weekend, Olivia threw a house party for all her friends. She was preparing at her best to make the party a memorable one. She went to super Mart to buy all the stuff for the party.

She bought:

- 1.wine bottles \$30
- 2.cream \$8
- 3.plates \$7.5
- 4.cakes \$15
- 5.dessert \$12.58
- 6.candles \$10
- 7.party pops \$9
- 8.table cloths \$14

On the day of party, she ordered dinner from restaurant:

1. 2 Plates spaghetti , each of \$12
2. 5 Tacos , each of \$9
3. 4 Lrge pizzas , each of \$14.91

Friends started arriving for the party all dressed up . They played games , danced and enjoyed. They had dinner at 9pm. Her friend Mary told , She'll not have wine & will go for coffee , but all of them insisted her to have it. The rest of night went smoothly and everyone enjoyed a lot.

Olivia's house party was a great success !

Use the story to answer the questions. show your work.

1. How much olivia spent in the super mart?
2. In total, how much did she spent for house party?
3. What percentage of total amount was spent for dinner?
4. What amount of money was wasted if 1 pizza & 2 tacos was not consumed?
5. How much change did olivia receive from \$200 in supermart?
